

Project Title: AI-Powered Data Analysis Tool Development

Project Description: We're looking for an experienced AI/ML developer to build a custom data analysis tool. This tool needs to process large datasets, identify trends, and generate predictive insights for our finance sector clients. The ideal candidate will have strong Python and machine learning framework skills (e.g., TensorFlow, PyTorch) and experience with data visualization libraries. We'll provide access to sample datasets for development and require a clean, well-documented codebase.

Budget: \$5,000 - \$10,000 (Fixed Price)

Skills Needed: Python, Machine Learning, Data Science, TensorFlow, PyTorch, Data Visualization, AWS/Azure (Optional)
